It is true that lately the LTC network difficulty has been keeping a stable level, but it is completely unreasonable to expect that to keep forever.

Please login or register Login with username Under this model, the miner pays a fee to the hosting company that would cover maintenance and electricity costs.. You can script mining cloud backgrounds that LTC was in a bit of a slumber pretty much.. With an average increase of 15% per readjustment the network difficulty will get to a level that there is absolutely no chance for you to even ROI, let alone profit from a 1 year contract if the price of BTC remains the same.

After all most of the people that mine crypto currencies do it to make some profit, so do run the numbers carefully through a profit calculator and consider when and where it is worth to invest into.. It is nice that there are no maintenance fees and the price you pay is for 1 year mining contract, but at the current state of things you will barely manage to get a return of the investment if the BTC network hashrate does not increase from its current level and we all know that this will not happen.. Unfortunately running the numbers with the current price of Bitcoin cloud mining of about 0. [How To Get Mac Address For Kodi](#)

A few days ago, after a slight delay in the original scheduled release date, Genesis Mining has added Bitcoin cloud mining option to their already available Scrypt cloud mining service and apparently a X11 cloud mining might be coming soon as well.. I can send you calculator on how much will you get At the moment things are not looking so bright as they were about three months ago, still we are almost halfway getting our investment back.. And again if you are going to bet on increase of the price of BTC in the future, then you better just buy Bitcoins now and wait for them to become more expensive.. If you invest now however things are already not looking so bright as you might not be able to ROI in the term of the contract (standard 1 year, though there are options available for 1.. Back in June, when we have purchased 1 MHS Scrypt cloud mining hashrate to test the service the price was about twice as high compared to now, but the profitability was about 3-4 times higher.. The price of LTC is also not that good either at the moment, but if you are going to bet on Litecoin getting more valuable, then you can just buy coins and profit from their price increase later on. 6e4e936fe3 [Best App To Download Music On Mac](#)
